

Better Practice. Better Life.

Introducing Medios EHR, the **easiest** to use and implement Electronic Health Record system on the market. Medios offers a revolutionary approach that breaks away from the outdated, complicated and traditional EHR model. Medios provides **powerful**, practical and fully **customizable** features that are designed to deliver the best solution for you and your practice while making implementation easy and **cost effective**.

"so easy to learn and use"

Freedom for Physicians

Medios is the only EHR that offers the physician the freedom to choose between 7 different innovative ways to document within the system. Whether you prefer to continue writing, dictating or electronic formats, Medios offers practical solutions that adapt to your preference and comfort level.

Customized to Your Practice

Medios is designed to adapt to the way you and your office work. Medios breaks away from the traditional industry approach and offers a high level of customization to ensure that the system is tailored specifically to the needs of your practice.

Service First

Our personal 24/7 service is what sets us apart. You will always speak to a human voice when calling and a specialist is dedicated specifically to your office ready to address any of your needs at any time.

Avoid Large Upfront Costs

Medios avoids the large upfront costs typically associated with traditional outdated EMR companies. Medios is available through affordable, low monthly payments and a minimal set up fee allowing you to have an immediate return on investment while experiencing the powerful advantages of an EHR.

Anywhere, Anytime Access

Medios is 100% Web based and offers secure and immediate access to your patient data from your home, hospital, office or any internet connection without prior installation or setup.

Extremely Easy to Use

Medios provides an extremely easy to use interface that was built for the average user with little technical experience. With its visually oriented interface, our innovative design is easy to work with and requires minimal training to learn and use.

Features... with a Difference

"service is outstanding and very personable"

No Major Infrastructure Needed

Medios EHR is designed to operate with the average computer avoiding additional costs of system or infrastructure upgrades.

Operating System Windows 2000 Professional, Windows® XP Professional, Windows® Vista or Mac OSX.

Processor & Speed Intel® Pentium® IV or Pentium® D, Single or Dual-Core processors 1.6 GHz or higher

Hard disk space 5 GB of free disk space

RAM 1 GB or more

It's All About Security

Medios EHR promotes increased accuracy, retention and management of medical information adhering to and surpassing the most stringent security standards. All information is transported via HL7 and/or appropriate XML standards, offering a portable and secure method of exchanging sensitive information with others. The system operates at the highest level of allowable encryption (256 bit). Our data sites have multiple redundancy built in at all levels (geographic, physical and data) and guarantee 99.999% uptime.
